

Application No. 10/726,535
Amendment dated April 21, 2008
Reply to Office Action of November 20, 2007

Docket No.: 0630-1874P

AMENDMENTS TO THE CLAIMS

RECEIVED
CENTRAL FAX CENTER

APR 21 2008

1. (Canceled)

2. (Previously Presented) A media pick-up device of a media dispenser, comprising:
a plurality of conveying rollers rotated by a driving force of a driving means, for conveying media;

first separating rollers arranged with overlaps to the conveying rollers to separate the media one by one; and

second separating rollers arranged to face an outer surface of the conveying rollers with gaps between the second separating rollers and the conveying rollers, for generating a frictional force to the media;

wherein, in order to maintain intervals between the conveying rollers and all of the separating rollers, first spacer rollers are mounted on a rotation shaft to which the conveying rollers are fixed, and second spacer rollers corresponding to the first spacer rollers are mounted on a shaft to which the first and second separating rollers are fixed.

3-9 (Canceled)

10. (Currently Amended) A media pick-up device of a media dispenser, comprising:
a plurality of conveying rollers rotated by a driving force of a driving means, for conveying media;

first separating rollers arranged with overlaps to the conveying rollers to separate the media one by one; and

second separating rollers arranged to face ~~an outer surface~~ outer surfaces of the conveying rollers with gaps between the second separating rollers and the conveying rollers, and

which form and maintain a gap with the facing outer surfaces of the conveying rollers greater than ~~the~~ a thickness of the media for generating a frictional force to the media regardless of ~~the~~ a stiffness of the media;

wherein both the first and second separating rollers are mounted on a same shaft.

11-20. (Canceled)
